The HSS Front Desk software has served our property well for years. A great support staff as well as a full suite of reporting tools within the software have helped our property to stay profitable.

A newer product that HSS has released: Web Res, has helped us even more with keeping revenue in our pocket. The great thing about HSS Web Res is that there are NEVER any commissions for online bookings through our own website! This really adds up to huge savings every year. It's nice to know we have full automation of room inventory management with this add on, and no chance for forgetting to pull a room from inventory manually.

Sincerely,

General Manager
